

4L60E Cable Repair Kit Installation Instructions

- Step 1 - Set the emergency brake and chock the wheels.
- Step 2 - Remove any old pieces of bushing material from the cable.
- Step 3 - Remove the lever from the transmission using a 15 MM wrench.
- Step 4 - Grind the backside of the lever where the factory pin is staked. making sure you do not grind past flush with the lever.
- Step 5 - Remove the old pin using a hammer and a punch by setting old pin on top of 15MM socket on a bench or table.
- Step 6 - When reinstalling lever onto the transmission make sure the clip is against the ground side of the lever
- Step 7 - Now install pin thru cable end, like an eyelet, then thru lever.
- Step 8 - Install e-clip on ground side of lever and you are done.

NOTE: Some Corvette Models may require you to drop the exhaust to be able to reach the shifter lever on the transmission and the Shifter Cable itself...
